Amendments to the Claims:

1-62. (canceled)

58. (currently amended) An isolated ~~native sequence~~ polypeptide comprising a sequence having at least 80% amino acid sequence identity to the amino acid sequence of amino acid residues 35-273 of SEQ ID NO:506, wherein the nucleic acid encoding the polypeptide is amplified in colon or lung tumors.

59. (currently amended) The isolated ~~native sequence~~ polypeptide of Claim 58 comprising a sequence having at least 85% amino acid sequence identity to the amino acid sequence of amino acid residues 35-273 of SEQ ID NO:506, wherein the nucleic acid encoding the polypeptide is amplified in colon or lung tumors.

60. (currently amended) The isolated ~~native sequence~~ polypeptide of Claim 58 comprising a sequence having at least 90% amino acid sequence identity to the amino acid sequence of amino acid residues 35-273 of SEQ ID NO:506, wherein the nucleic acid encoding the polypeptide is amplified in colon or lung tumors.

61. (currently amended) The isolated ~~native sequence~~ polypeptide of Claim 58 comprising a sequence having at least 95% amino acid sequence identity to the amino acid sequence of amino acid residues 35-273 of SEQ ID NO:506, wherein the nucleic acid encoding the polypeptide is amplified in colon or lung tumors.

62. (currently amended) The isolated ~~native sequence~~ polypeptide of Claim 58 comprising a sequence having at least 99% amino acid sequence identity to the amino acid sequence of amino acid residues 35-273 of SEQ ID NO:506, wherein the nucleic acid encoding the polypeptide is amplified in colon or lung tumors.

63. (previously presented) An isolated polypeptide comprising the amino acid sequence of amino acid residues 35-273 of SEQ ID NO:506.

64. (canceled)

65. (canceled)

66. (canceled)

67. (canceled)

68. (canceled)

69. (previously presented) A chimeric polypeptide comprising a polypeptide according to Claim 58 fused to a heterologous polypeptide.

70. (previously presented) The chimeric polypeptide of Claim 69 wherein said heterologous polypeptide is an epitope tag or an Fc region of an immunoglobulin.
